We always upgrade our products by updating processes to meet buyer's specification. Our fast and secure products delivery system involving all sorts of logistic facilities established our reach all over the world.

EXPORTER OF LAC BASED PRODUCTS

<https://shreemoniexports.com/>

Shellac is a non-toxic, edible, and amorphous natural resin. It is one of the oldest binding and polishing product known to mankind; because of its thermoplastic and non-toxic property, shellac is widely used in the cosmetic, food, pharmaceutical, and wood industry. We, one of the largest shellac exporter in India, distribute both machine made and handmade shellac of premium quality to local and international industries.

Dewaxed Garnet Shellac is made available in different grades varying from color index to wax percentage of Acid Value 60-80
MG KOH/G.

These products are available in wider specification and undergo certain checks to ensure the purity of this product. We are offering this product at affordable prices.

Dewaxed Super Blonde Shellac is processed by using advanced techniques with Acid Value 60-80 MG KOH/G. This shellac is mainly used as food glaze, wood finish and brush on colorant. We also offer Dewaxed Flake Shellac in different packaging options at reasonable rates.

Our Dewaxed Blonde Shellac is the best quality product with the long self-life shellac with impurity as below as 0.2% and used in pharma and food additives.

Our product Dewaxed Platina Shellac is processed and sold as dry flakes, which are dissolved in denatured alcohol to make liquid shellac, which is used as a brush-on colourant, food glaze and wood finish. These are consistently checked on various quality parameters and are highly favored for their superior quality.

Our product Dewaxed Platina Shellac is processed and sold as dry flakes, which are dissolved in denatured alcohol to make liquid shellac, which is used as a brush-on colourant, food glaze and wood finish. These are consistently checked on various quality parameters and are highly favored for their superior quality.

Dewaxed Orange Shellac is a pure form of shellac, which is suitable for paint and varnish with lustrous look and polishing purposes. It is available in air tight packaging options to assure its safety during transit.

Bysakhi Light Pure Button Lac

Kushmi Pure Button Lac

Seedlac

Shreemoni Exports is always committed to export various grades of high-quality seedlac to our customers. We procure the raw materials from some of the best producers in the region, processing near the lac-growing sites to ensure maximum retention of the product. Efficient processing allows us to yield 40% to 60% conversion of the raw materials to finished product.

Aleuritic acid is an essential component of pharmaceutical and perfume industry. Processed while manufacturing shellac flakes in India, it is one of our primary export items to many of our customers. This product contains 99% purity, which is essential for synthesising various products like Ambrettolide, Exaltone, Civetone, etc.

Bleached shellac is a colourless natural resin processed from lac. Bleached shellac India is bio-degradable without any non-toxic properties. We supply pure bleached shellac in powdery form; a careful multistep manufacturing process allows to control the quality of the finished product according to the requirement. You will find the finest bleached shellac at the most affordable prices at Shreemoni Exports.

Dewaxed bleached shellac is processed from bleached lac, where the wax of the lac is removed with the help of various solvents. Dewaxed bleached lac India is a food grade material which is often used to protect and extend a product's non-refrigerated shelf life. Shreemoni Exports supplies various grades of dewaxed bleached shellac, with impurity as low as 0.2% in the manufactured product.
